

RONGISTOP

Rat & rodent repellent

USES

Protects from damages caused by rodents (rats, mice, squirrels, etc.) in garages, car parks (particularly underground car parks close to fields, woods, forests, etc.), attics, cellars, garden sheds, etc.

PROPERTIES & ADVANTAGES

- ▶ Rongistop contains an olfactory repellent made up of essential oils, which creates a protective barrier against rodents.
- ▶ Prevents rubber and plastic parts (hoses, electric cables, rubber pipes, upholstery, sheaths, etc.) from being bitten by rodents.
- ▶ Biocidal action.

INSTRUCTIONS FOR USE

- ▶ Shake well before use and spray thoroughly on the surfaces to be covered.
- ▶ For optimal effectiveness, repeat every 15 days, depending on the risk.
- ▶ In vehicles (cars, lorries, motorbikes, quads, gardening equipment, etc.): spray on all synthetic and rubber parts of the engine bay. For marine use, use the product in the engine room or battery compartment of boats.

PRECAUTIONS FOR USE

Before use, carefully read the safety information on the label of the product and check the instructions given on the Health and Safety Data Sheet available at yacco.com.

- ▶ Do not spray close to live electrical equipment.
- ▶ Use only when equipment is unplugged.
- ▶ Wait 5 minutes before plugging back in.
- ▶ Avoid spraying in the presence of sensitive individuals, young children and pets.
