

Multi-Surface disinfectant

Triple-action disinfectant: viruses, bacteria and fungi

USES

YACCO **Multi-Surface disinfectant** is a quick drying hydroalcoholic disinfectant spray. It is suitable for all surfaces and objects that are predicted to come into contact with the skin.

This multipurpose triple-action disinfectant is effective against viruses, bacteria and fungi. Does not require rinsing. Can be used upside down.

PROPERTIES & ADVANTAGES

▶ Bactericidal activity according to EN 1276 and EN 13697 standards.
Fungicidal activity according to EN 13697 standard.
Virucidal activity according to EN14476/A1/A2 standard, TP2 biocide.

▶ Contains an active ingredient recognized by the French national public health agency to be effective against coronavirus.

▶ Designed for everyday use: disinfection of surfaces (steering wheel, handles, desks, cloakrooms, waiting rooms, meeting rooms...).

Caution: this disinfectant is not used in substitution of sanitary measures: wear a mask, barrier gestures, wash your hands...

▶ Suitable for the decontamination of all material surfaces in vehicles, exhibition and convention centers, workshops, offices, toilets....

INSTRUCTIONS FOR USE

▶ Can be used in any position including upside down.

▶ Spray directly on the surface to be treated.

▶ Let the product penetrate and act, rub with a brush or a clean sponge.

▶ If necessary, depending on the surface, thoroughly rinse with clean water or wipe with a dry and clean cloth.

PRECAUTIONS FOR USE

- ▶ Easily flammable product.
- ▶ Keep away from flames and sources of ignition.
- ▶ Do not expose to temperatures exceeding 50°C
- ▶ Use this aerosol only for its intended purposes.

Before use, follow the safety instructions on the packaging and Material Safety Data Sheet, available upon request at yacco.com.
