

SVX 1000 SNOW 2T

100% synthetic ester-based oil for 2-stroke snowmobile engines

USES

100% synthetic oil specifically designed for use in 2-stroke snowmobile engines equipped with carburettors or fuel-injection systems.

Compatible with separated and pre-mix lubrication.

Mixing ratio: 1% to 3%, depending on the manufacturer's requirements.

Specifications:

API TC JASO FD ISO-L-EGD

MAIN PHYSICAL DATA

	Methods	Units	Values
Density at 20°C	ASTM D4052	kg/m³	877
Kinematic viscosity at 40°C	ASTM D445	mm²/s	79
Kinematic viscosity at 100°C	ASTM D445	mm²/s	12
Viscosity index	ASTM D2270		147
Pour point	ASTM D97	°C	-51
Cleveland Open Cup Flash Point	ASTM D92	°C	110
Colour			Blue

The data given in this table represents typical production values and should not be taken as specifications.

PROPERTIES & ADVANTAGES

- ▶ Very low pour point, meaning it can be used in separated lubrication systems at low temperatures.
- ➤ Synthetic ester bases provide exceptional resistance to high temperatures, preventing engines from seizing.
- ► Excellent anti-smoke properties.
- ▶ Pre-diluted for instant and stable mixing with fuel.
- ► Low-ash formula to prevent the formation of deposits in the combustion chamber.
- ▶ Prevents clogged exhaust pipes, ports and pistons.
