

GRAISSE SELLETTE

Fifth wheel grease

USES

Specifically designed for the lubrication of fifth wheels on heavy-duty vehicles.

Use sparingly for optimal effectiveness.

Apply with a paintbrush, a spatula or a brush after having removed dirt and abrasive dust. (Do not clean with solvents).

Specifications:

NLGI grade 1
ISO 6743-9 ISO-L-XAEHB 1
DIN 51502 DIN MPF1R-10

MAIN PHYSICAL DATA

	Values
Colour	Brown
Appearance	Smooth, adhesive
Consistency (penetration 60 strokes)	310-340 (1/10mm)
Drop point	>200 °C
Thickener	Inorganic
Welding load	>500kg

The data given in this table represents typical production values and should not be taken as specifications.

PROPERTIES & ADVANTAGES

- ▶ Very high adhesion.
- ▶ Creates an oil film which absorbs shocks and avoids metal to metal contact.
- ▶ Excellent anti-wear, anti-rust and anti-seizing properties.
- ▶ Water insoluble.
